Subject Index

A

ABO blood group genes, in chimpanzee 211–214
Aegilops speltoides, Ph' gene from 417–421
Allacma fusca, spermatogenesis in 351–358
α1-antitrypsin polymorphism (A1AT), in dog 174–176
American puma, mitochondrial DNA in 186–197
Ametapodia mutation, in chicken 340–342
Anopheles albimanus, chromosomes in 364–370
Anopheles gambiae
  chromosomes in 364–370
  geographical gene flow barrier for 165–168
  Mosaic (Mos) mutation in 128–133
Anterior segment dysgenesis (ASD), in Rocky Mountain horse 93–98
Anthocyanins, in purple basil 289–296
Antibody response, in meat-type chickens 24–30
A1AT. *See* α1-antitrypsin polymorphism
Apis mellifera L. *See* Honeybee
Aquila adalberti. See Iberian imperial eagle
Arabidopsis thaliana, ultraviolet-B radiation in 228–233
Arctocephalus philippii. See Juan Fernández fur seal
ASD. *See* Anterior segment dysgenesis
Astrobrachion constrictum. See Brittle star
Atlantic salmon, major histocompatibility complex in 359–363
Autocorrelation analysis, in conservation 31–35
AUTOTET computer program 348–349

B

Barbus, mitochondrial DNA in 283–288
Barley, multiovary mutants of 483–487
Baur, Erwin 435–440
Bean, simple sequence repeat in 429–434
Berg River redfin, mitochondrial DNA in 122–127
Bitterlings, masculinization of *Tanakia* hybrids 464–473
Blue sheep chromosomes 168–170
Boa constrictor, salmon mutation in 254–256
Boine snake *Boa constrictor,* salmon mutation in 254–256
Bonytail chub, captive broodstock for 35–39
Borojevic, Slavko 268
Brassica napus, flowering time variation in 242–246
Brazilian cat, long hair in 49–57
Brittle star, mitochondrial DNA in 146–149
Bromus inermis Leyss. *See* Smooth bromegrass
Brown stem rot (BSR), soybean resistance to 316–321
BSR. *See* Brown stem rot
Bubalus bubalis. See Water buffalo
Bubalus mindorensis. See Tamaraw

C

Canis familiaris. See Dog
Capsicum. See Peppers
Carnation, *evergreen* gene in 487–491
Carp, glucosephosphate isomerase in common 400–402
Carya illinoinensis. See Pecan
Cattle, genetic linkage mapping in 446–457
Cervus elaphus. See Red deer
Cervus eldi. See Eld's deer
Chicken
  ametapodia mutation in 340–342
  insulin-like growth factor gene in 150–156
  restriction fragment length polymorphism in 24–30
Chickpea
  double podding gene in 234–236
  flowering gene in 67–68, 416–417
  leaf necrosis gene in 79–81
Chimpanzee
  ABO blood group genes in 211–214
  RH genes in 205–210
Chinook salmon, supplementation in 112–116
Chlorophyll, deficient mutants in soybean 297–303
Chloroplast, in sweet, sour, and ground cherry 75–79
Chromosomes
  Anopheles 364–370
  blue sheep 168–170
  cotton 326–332
  Japanese quail 499–501
  Norway rat 345–347
  pea 322–325
  Peromyscus 162–165
  polychaete worm 18–23
Cicer arietinum L. *See* Chickpea
Coelacanth, color vision of 215–220
Coffea arabica L., single-locus inheritance in 81–85
Coloration
  boine snake *Boa constrictor* 254–256
  Cucurbita pepo 333–339
  January tetra 411–412
  Japanese quail 499–501
  morning glory 491–495
  NuMex Piñata 60–61
  purple basil 289–296
  rainbow trout 405–407
  winter rye 237–241
Common bean, simple sequence repeat in 429–434
Computer program
  for analyzing autotetraploid genotypic data 348–349
  for analyzing mixtures of organisms 509–510
  for calculating DNA fragment length 177–178
  for calculating population genetic distance and identity 178–179
  for population assignment of individuals 87–89
  for simulation of marker-assisted selection 86–87
  for simulation of molecular population genetic diversity 506–509
Correns, Carl 435–440
Cotton, microsatellites in 326–332
Coturnix coturnix japonica. See Japanese quail
Coulter pine, founder effects and genetic structure of 307–315

Subject Index

A

  Japanese quail 499–501
  Norway rat 345–347
  pea 322–325
  Peromyscus 162–165
  polychaete worm 18–23
Cicer arietinum L. *See* Chickpea
Coelacanth, color vision of 215–220
Coffea arabica L., single-locus inheritance in 81–85
Coloration
  boine snake *Boa constrictor* 254–256
  Cucurbita pepo 333–339
  January tetra 411–412
  Japanese quail 499–501
  morning glory 491–495
  NuMex Piñata 60–61
  purple basil 289–296
  rainbow trout 405–407
  winter rye 237–241
Common bean, simple sequence repeat in 429–434
Computer program
  for analyzing autotetraploid genotypic data 348–349
  for analyzing mixtures of organisms 509–510
  for calculating DNA fragment length 177–178
  for calculating population genetic distance and identity 178–179
  for population assignment of individuals 87–89
  for simulation of marker-assisted selection 86–87
  for simulation of molecular population genetic diversity 506–509
Correns, Carl 435–440
Cotton, microsatellites in 326–332
Coturnix coturnix japonica. See Japanese quail
Coulter pine, founder effects and genetic structure of 307–315

Cowpea, seed coat texture in 170–174
Crown rust fungus, smooth bromegrass resistance to 480–483
Cucurbita pepo, fruit color intensity in 333–339
Cyprinus carpio. See Carp
Cytochrome *b* gene, in *Barbus* 283–288
Cytogenics
  Barbus 283–288
  tamaraw 117–121

D

Daphnia. See Water fleas
Diadegma chrysostictos, sex determination in 104–111
Dianthus caryophyllus. See Carnation
Diploid wheat, vernalization genes in 304–306
DNA. *See* Microsatellites; Mitochondrial DNA; Random amplification of polymorphic DNA; Satellite DNA
Dog
  A1AT polymorphism in 174–176
  X trisomy in infertile bitch 149–150
Domestic cat, long hair in 49–57
Drosophila
  pseudogene evolution in 221–227
  sexual isolation in 99–103

E

Elaphurus davidianus. See Père David's deer
Eld's deer, conservation of 402–405
Eschrichtius robustus. See Gray whale
European otter, mitochondrial DNA in 31–35
Evergreen gene, in carnation 487–491
Evolutionary genetics 221–227

F

Felis catus. See Domestic cat
FISH. *See* Fluorescence in situ hybridization
Fitch, Walter M. 183–185
Flour beetles, fitness in 407–411
Fluorescence in situ hybridization (FISH)
  in *Medicago sativa* 256–260
  in polychaete worm 18–23
  in scarab beetle 260–264
Fragment Length Calculator computer program 177–178

G

Gallus domesticus. See Chicken
Genetic analysis. *See* Genetic linkage mapping
Genetic linkage mapping
  common bean 429–434
  grasspea 142–145
  Hippocrepis valentina 134–141
  Japanese brown frog 1–7
  Japanese quail 499–505
  karyotypic rearrangements and 423–428
  Myrica 61–66
  North European cattle 446–457
  bovine 343–345
  soybean 378–383, 392–396
  water flea 8–17
  wheat 441–445
  See also Random amplification of polymorphic DNA; Satellite DNA
Genetics
  chickpea 67–68, 79–81, 234–236
  chimpanzee ABO blood group genes 211–214
  Coulter pine 307–315
  F_2 maize 384–391
  mammalian gene clusters 198–204
  plastid inheritance of *Pelargonium* 435–440
  population, of *Myrica* 61–66
  pseudogene evolution 221–227
  RH genes in hominoids 205–210
  See also Genetic linkage mapping
Gila elegans. See Bonytail chub
Glucosephosphate isomerase (GPI), in common carp 400–402
Glycine max (L.) Merr. *See* Soybean
Gorilla *RHCE*-like gene 205–210
Gossypium hirsutum L. *See* Cotton
GPI. *See* Glucosephosphate isomerase
Grasspea, genetics of isozymes in 142–145
Gray whale, major histocompatibility complex class I from 279–282
Ground cherry, chloroplast and DNA in 75–79
Gymnopleurus sturmi McLeay. *See* Scarab beetle

H

Hemigrammus hyanuary. See January tetra
High-performance liquid chromatography (HPLC), in purple basil 289–296
Hippocrepis valentina, genetic differentiation of 134–141
Hominoids, *RH* genes in 205–210
Honeybee
  mitochondrial DNA in 42–46
  quantitative trait loci in 474–479
Hordeum vulgare L. *See* Barley
HPLC. *See* High-performance liquid chromatography
Human influenza virus A 183–185
Hybridization
  Coffea arabica L. 81–85
  dominant markers 46–49
  Pisum fulvum 322–325
Hypotrichosis, in Norway rat 345–347

I

Iberian barbel fish. *See Barbus*
Iberian imperial eagle, genetic diversity in 495–499
IGF-I gene. *See* Insulin-like growth factor I (IGF-I) gene
Influenza virus A 183–185
INHA/INHBA/INHBB genes 343–345
Inheritance. *See* Genetics; *specific plants and animals*
Insulin-like growth factor I (IGF-I) gene, in chicken 150–156
Intron 6 sequences 211–214
Ipomoea purpurea. See Morning glory
Isozymes, in grasspea 142–145

J

Jack O'Lantern pumpkin, color intensity in 333–339
January tetra, iris coloration of 411–412
Japanese brown frog, genetic linkage mapping of 1–7
Japanese flounder, mitochondrial DNA in 271–278
Japanese quail
  color mutations of 499–501
  satellite DNA of 412–415, 502–505
Juan Fernández fur seal, mitochondrial DNA in 371–377

K

Karyotypic rearrangements, genetic linkage mapping and 423–428

L

Lake trout, major histocompatibility complex in 359–363
Lathyrus sativus L. *See* Grasspea
Latimeria chalumnae. See Coelacanth
Linkage analysis/mapping. *See* Genetic linkage mapping
Lutra lutra. See European otter

M

Maize, genetic variation in F_2 population 384–391
Major histocompatibility complex (MHC)
  chicken 24–30
  gray whale class I 279–282
  lake trout class II 359–363
  mammalian class II 198–204
Marker-assisted selection (MAS) 24–30, 86–87
Markert, Clement L. 265–267
MAS. *See* Marker-assisted selection
Massasauga rattlesnake, RAPD versus microsatellite markers in 458–463
Medicago glomerata Balb., rRNA genes in 256–260
Medicago sativa L., rRNA genes in 256–260
MHC. *See* Major histocompatibility complex
Microsatellites
  cotton 326–332

Japanese quail 502–505
massasauga rattlesnake 458–463
See also Simple sequence repeat
Mitochondrial DNA (mtDNA)
in American puma 186–197
in *Anopheles gambiae* 165–168
in *Barbus* 283–288
in Berg River redfin 122–127
in brittle star 146–149
in European otter 31–35
in honeybee 42–46
in Japanese flounder 271–278
in Juan Fernández fur seal 371–377
in nematodes 156–158
in Philippine freshwater sardine 247–253
in tortoise 39–41
Morning glory, coloration in 491–495
Mosaic (Mos) mutation, in *Anopheles gambiae* 128–133
Mosquito. *See Anopheles*
Mos. See Mosaic (Mos) mutation
mtDNA. *See* Mitochondrial DNA
Mutation
barley 483–487
Boa constrictor 254–256
chicken 340–342
Japanese quail 499–501
Mosaic 128–133
shn 345–347
soybean 297–303, 378–383
Myrica, population genetics of 61–66

N

Nematode, mitochondrial DNA in 156–158
NORs. *See* Nucleolar organizer regions
North European cattle, genetic linkage mapping of 446–457
Norway rat, hypotrichosis in 345–347
Nucleolar organizer regions (NORs), of polychaete worms 18–23
NuMex Piñata jalapeño pepper, fruit color in 60–61

O

Ocimum basilicum L. *See* Purple basil
Octyl acetate/butyrate, in wild parsnip 68–71
Oncorhynchus. See Pacific salmon
Oncorhynchus mykiss. See Rainbow trout
Oncorhynchus tschawytscha. See Chinook salmon
Ophryotrocha. See Polychaete worm
Outcrossing rates, in pecan 72–75
Ovine genetic linkage mapping 343–345

P

Pacific salmon, major histocompatibility complex in 359–363
Paederus riparius. See Rove beetle
Paralichthys olivaceus. See Japanese flounder
Pastinaca sativa. See Wild parsnip
Pea, distorted segregation in 322–325
Pecan, outcrossing rates and relatedness in 72–75
Pelargonium, plastid inheritance of 435–440
Peppers, fruit color in 60–61
Père David's deer, and red deer hybrids 397–400
Peromyscus chromosomes 162–165
Phaseolus vulgaris L. *See* Common bean
Philippine freshwater sardine, mitochondrial DNA in 247–253
PI 567609 soybean plant 316–321
Pisum fulvum hybridization 322–325
Pisum sativum L. *See* Pea
PLABSIM computer program 86–87
Plastids
inheritance of 435–440
ultrastructure of 237–241
pln3 quantitative trait locus 474–479
Polychaete worm, nucleolar organizer regions of 18–23
POPDIST computer program 178–179
Prunus avium L. *See* Sweet cherry
Prunus cerasus L. *See* Sour cherry
Prunus fruticosa Pall. *See* Ground cherry
Pseudobarbus burgi. See Berg River redfin
Pseudogene evolution 221–227
Pseudois nayaur. See Blue sheep
Puccinia coronata Corda. *See* Crown rust fungus
Puma concolor. See American puma
Purple basil, anthocyanin instability in 289–296

Q

qi gene. *See Quiescent intense (qi)* gene
QTL. *See* Quantitative trait loci
Quantitative trait loci (QTL)
in deer 397–400
in honeybee 474–479
Quiescent intense (qi) gene 333–339

R

Rainbow trout, yellow color inheritance in 405–407
Rana japonica. See Japanese brown frog
Random amplification of polymorphic DNA (RAPD)
in Iberian imperial eagle 495–499
in massasauga rattlesnake 458–463
in soybean 392–396
RAPD. *See* Random amplification of polymorphic DNA
Red deer, and Père David's deer hybrids 397–400
Renner, Otto 435–440
Restriction fragment length polymorphism (RFLP)
in chicken 24–30
in soybean 392–396
in wheat 441–445
RFLP. *See* Restriction fragment length polymorphism
RH1. *See* Rhodopsin (RH1) pigments
RH2. *See* Rhodopsin-like (RH2) pigments
RH genes, in hominoids 205–210
Rhodopsin (RH1) pigments 215–220
Rhodopsin-like (RH2) pigments 215–220
Rift Valley 165–168
Rocky Mountain horse, anterior segment dysgenesis in 93–98
Rove beetle, polymorphism in 158–162

S

Salmon mutation, in boine snake *Boa constrictor* 254–256
Salmo salar. See Atlantic salmon
Salvelinus namaycush. See Lake trout
Sardinella tawilis. See Philippine freshwater sardine
Satellite DNA
Japanese quail 412–415
water buffalo 117–121
Scarab beetle, karyotype, banding, and fluorescent in situ hybridization in 260–264
Secale cereale L. *See* Winter rye
Sex determination
in *Diadegma chrysostictos* 104–111
in Symphypleonan Collembola 351–358
Sexual isolation, in *Drosophila* 99–103
shn mutation. *See* Shorn (*shn*) mutation
Shorn (*shn*) mutation 345–347
SIMCOAL computer program 506–509
Simple sequence repeat (SSR)
common bean 429–434
cotton 326–332
See also Microsatellites
Sistrurus c. catenatus. See Massasauga rattlesnake
Sminthurus viridis, spermatogenesis in 351–358
Smooth bromegrass, resistance to crown rust fungus in 480–483
Sour cherry, chloroplast and DNA in 75–79
Soybean
brown stem rot resistance in 316–321
chlorophyll-deficient mutants in 297–303
genetic linkage mapping 378–383, 392–396
w4-m sterile mutant 378–383
SPAM computer program 509–510
Spermatogenesis, in *Allacma fusca* 351–358
SSR. *See* Simple sequence repeat
Supplementation, in chinook salmon 112–116
Sweet cherry, chloroplast and DNA in 75–79

Symphypleonan Collembola, sex determination in 351–358

T

Tamaraw, cytogenetic analysis of 117–121
Tanakia hybrids, masculinization of 464–473
Testudo graeca. *See* Tortoise
Tortoise, mitochondrial DNA in 39–41
Tribolium confusum. *See* Flour beetles
Triploids, estimation of 57–60
Triticum aestivum L. *See* Wheat
Triticum monococcum. *See* Diploid wheat
Turkish honeybee, mitochondrial DNA in 42–46

U

Ultraviolet-B radiation, in *Arabidopsis thaliana* 228–233

V

Vernalization genes, in diploid wheat 304–306
Vrn-A^{m}1/2 gene 304–306

W

w4-m sterile soybean mutant 378–383
Water buffalo, satellite DNA of 117–121
Water fleas, genetic differentiation among 8–17
Wheat
  genetic linkage mapping 441–445
  Ph^i gene 417–421
WHICHRUN computer program 87–89
Wild parsnip, octyl acetate/butyrate in 68–71
Winter rye, white yellow virescent pattern in 237–241

X

X trisomy, in infertile bitch 149–150

Z

Zea mays L. *See* Maize

Title Index

A

Aberrant Spermatogenesis and the Peculiar Mechanism of Sex Determination in Symphypleonan Collembola (Insecta) 351–358

Anthocyanin Inheritance and Instability in Purple Basil (*Ocimum basilicum* L.) 289–296

AUTOTET: A Program for Analysis of Autotetraploid Genotypic Data 348–349

C

Characterization and Chromosomal Distribution of a Novel Satellite DNA Sequence of Japanese Quail (*Coturnix coturnix japonica*) 412–415

Chloroplast Inheritance and DNA Variation in Sweet, Sour, and Ground Cherry 75–79

Chromosomal Assignment of Microsatellite Loci in Cotton 326–332

Chromosome Evolution of the Blue Sheep/Bharal (*Pseudois nayaur*) 168–170

Classifying Genealogical Origins in Hybrid Populations Using Dominant Markers 46–49

Color Vision of the Coelacanth (*Latimeria chalumnae*) and Adaptive Evolution of Rhodopsin (RH1) and Rhodopsin-like (RH2) Pigments 215–220

A Comparison of RAPD Versus Microsatellite DNA Markers in Population Studies of the Massasauga Rattlesnake 458–463

Complete Nucleotide Sequence of Japanese Flounder (*Paralichthys olivaceus*) Mitochondrial Genome: Structural Properties and Cue for Resolving Teleostean Relationships 271–278

Cytogenetic Analysis of the Tamaraw (*Bubalus mindorensis*): A Comparison of R-Banded Karyotype and Chromosomal Distribution of Centromeric Satellite DNAs, Telomeric Sequence, and 18S–28S rRNA Genes with Domestic Water Buffaloes 117–121

D

Detection of RFLP Markers Associated with Antibody Response in Meat-Type Chickens: Haplotype/Genotype, Single-Band, and Multiband Analyses of RFLP in the Major Histocompatibility Complex 24–30

Distorted Segregation Resulting from Pea Chromosome Reconstructions with Alien Segments from *Pisum fulvum* 322–325

Does Fitness Erode in the Absence of Selection? An Experimental Test with *Tribolium* 407–411

E

Epistatic Interaction Between Vernalization Genes *Vrn-A^{m}1* and *Vrn-A^{m}2* in Diploid Wheat 304–306

Erwin Baur or Carl Correns: Who Really Created the Theory of Plastid Inheritance? 435–440

Establishing a Captive Broodstock for the Endangered Bonytail Chub (*Gila elegans*) 35–39

Estimates of Genetic Variance in an F_2 Maize Population 384–391

The *Evergreen* Gene is Essential for Flower Initiation in Carnation 487–491

Evolution of *RH* Genes in Hominoids: Characterization of Gorilla *RHCE*-like Gene 205–210

F

Fifty Microsatellite Markers for Japanese Quail 502–505

Floral-Color Polymorphism in *Ipomoea purpurea*: Biased Inheritance of the Dark Allele is not a General Explanation for its Maintenance 491–495

Founder Effects and the Genetic Structure of Coulter Pine 307–315

Fragment Length Calculator: A Windows 95 Program for Calculating DNA Fragment Length 177–178

G

Gene Diversity of Chimpanzee ABO Blood Group Genes Elucidated from Intron 6 Sequences 211–214

A Gene for Leaf Necrosis in Chickpea (*Cicer arietinum* L.) 79–81

Genetic Analyses of Plumage Color Mutations on the Z Chromosome of Japanese Quail 499–501

Genetic Analyses of Two Independent Chlorophyll-Deficient Mutants Identified Among the Progeny of a Single Chimeric Foliage Soybean Plant 297–303

Genetic Control of Glucosephosphate Isomerase (GPI) in Common Carp (*Cyprinus carpio* L.) 400–402

Genetic Differentiation Among Oregon Lake Populations of the *Daphnia pulex* Species Complex 8–17

Genetic Differentiation and Structure of *Hippocrepis valentina* (Leguminosae) Populations 134–141

Genetic Dissection of Honeybee (*Apis mellifera* L.) Foraging Behavior 474–479

Genetic Diversity and Population Structure of 20 North European Cattle Breeds 446–457

Genetic Linkage Groups in the Japanese Brown Frog (*Rana japonica*) 1–7

Genetics and Cytology of a Genic Male-Sterile, Female-Sterile Mutant from a Transposon-Containing Soybean Population 378–383

Genetics of Isozymes in Grasspea 142–145

Genetics of Rough Seed Coat Texture in Cowpea 170–174

Genetic Variability in the Iberian Imperial Eagle (*Aquila adalberti*) Demonstrated by RAPD Analysis 495–499

Genomic Ancestry of the American Puma (*Puma concolor*) 186–197

H

Heritability Estimates for Octyl Acetate and Octyl Butyrate in the Mature Fruit of the Wild Parsnip 68–71

Heteroplasmy of Mitochondrial DNA in the Ophiuroid *Astrobrachion constrictum* 146–149
High Levels of MHC Class II Allelic Diversity in Lake Trout from Lake Superior 359–363
The Horse Homolog of Congenital Aniridia Conforms to Codominant Inheritance 93–98
The Hypotrichosis-Generating Shorn (*shn*) Mutation Maps to Distal Chromosome 7 in the Norway Rat 345–347

I

The Impact of Supplementation in Winter-Run Chinook Salmon on Effective Population Size 112–116
Improved Estimation of the Proportion of Triploids in Populations with Diploid and Triploid Individuals 57–60
Inheritance of Flower Color in Chickpea 416–417
Inheritance of Resistance in Smooth Bromegrass to the Crown Rust Fungus 480–483
Inheritance of Unique Fruit and Foliage Color Mutation in NuMex Piñata 60–61
Inheritance of UV-B Tolerance in Seven Ecotypes of *Arabidopsis thaliana* L. Heynh. and Their F_1 Hybrids 228–233
Integration of Simple Sequence Repeat (SSR) Markers into a Molecular Linkage Map of Common Bean (*Phaseolus vulgaris* L.) 429–434
Investigating the Genetic Model for Brown Stem Rot Resistance in Soybean 316–321
Isolation, Mapping, and Characterization of Two Barley Multiovary Mutants 483–487
Is There Really Natural Selection Affecting the *I* Frequencies (Long Hair) in the Brazilian Cat Populations? 49–57

K

Karyotype Analysis, Banding, and Fluorescent *in situ* Hybridization in the Scarab Beetle *Gymnopleurus sturmi* McLeay (Coleoptera Scarabaeoidea: Scarabaeidae) 260–264
Karyotype Identity of Two Subspecies of Eld's Deer [*Cervus eldi* (Cervinae, Artiodactyla)] and Its Consequences for Conservation 402–405

L

Linkage Mapping in Populations with Karyotypic Rearrangements 423–428
Linkage Mapping of the Ovine Alpha-Inhibin (*INHA*), $Beta_A$-Inhibin/Activin (*INHBA*), and $Beta_B$-Inhibin/Activin (*INHBB*) Genes 343–345

M

Maintenance of Chromosome Arm Integrity Between Two *Anopheles* Mosquito Subgenera 364–370
A Major Gene for Time of Flowering in Chickpea 67–68
Major Histocompatibility Complex Class I Loci from the Gray Whale (*Eschrichtius robustus*) 279–282
Masculinization Mechanism of Hybrids in Bitterlings (Teleostei: Cyprinidae) 464–473
Mitochondrial DNA Differentiation in the Critically Endangered Berg River Redfin (*Pseudobarbus burgi*) 122–127
Mitochondrial DNA Haplotyping of *Testudo graeca* on Both Continental Sides of the Straits of Gibraltar 39–41
Mitochondrial DNA Variation in the European Otter (*Lutra lutra*) and the Use of Spatial Autocorrelation Analysis in Conservation 31–35
Molecular Phylogeny of Philippine Freshwater Sardines Based on Mitochondrial DNA Analysis 247–253
Monogenic Control of Iris Coloration in the January Tetra (*Hemigrammus hyanuary* Characidae) 411–412
Mosaic: A Position-Effect Variegation Eye-Color Mutant in the Mosquito *Anopheles gambiae* 128–133
Mottled Coloration in a Rainbow Trout is Associated with Mosaicism for Albinism 405–407

N

Neutrality Tests on mtDNA: Unusual Results from Nematodes 156–158
A New Recessive Ametapodia Mutation in the Chicken (*Gallus domesticus*) 340–342
NOR Regions of Polychaete Worms of the Genus *Ophryotrocha* Studied by Chromosome Banding Techniques and FISH 18–23
Novel Flowering Time Variation in the Resynthesized Polyploid *Brassica napus* 242–246

O

Origins and Divergence Times of Mammalian Class II MHC Gene Clusters 198–204
Outcrossing Rates and Relatedness Estimates in Pecan (*Carya illinoinensis*) Populations 72–75

P

Penetrance and Expressivity of the Gene for Double Podding in Chickpea 234–236
Ph^1 Gene Derived from *Aegilops speltoides* Induces Homoeologous Chromosome Pairing in Wide Crosses of *Triticum aestivum* 417–421
Physical Location of Homoeologous Groups 5 and 6 Molecular Markers Mapped in *Triticum aestivum* L. 441–445
Physical Mapping of rRNA Genes in *Medicago sativa* and *M. glomerata* by Fluorescent *in situ* Hybridization 256–260
PLABSIM: Software for Simulation of Marker-Assisted Backcrossing 86–87
Polymorphism of $Alpha_1$-Antitrypsin in North American Species of *Canis* 174–176
POPDIST, Version 1.1.1: A Program to Calculate Population Genetic Distance and Identity Measures 178–179
Population Genetics of Geographically Restricted and Widespread Species of *Myrica* (Myricaceae) 61–66
Possible Genetic Basis of Pederin Polymorphism in Rove Beetles (*Paederus riparius*) 158–162
Predicting the Evolution of Human Influenza A 183–185
Pseudogene Evolution and Natural Selection for a Compact Genome 221–227

Q

QTL for Pubertal and Seasonality Traits in Male Père David's x Red Deer Interspecies Hybrids 397–400
Quiescent intense (*qi*): A Gene That Affects Young but not Mature Fruit Color Intensity in *Cucurbita pepo* 333–339

R

Recent Radiation of Iberian Barbel Fish (Teleostei, Cyprinidae) Inferred from Cytochrome *b* Genes 283–288
Recombination, Statistical Power, and Genetic Studies of Sexual Isolation in *Drosophila* 99–103
The Rift Valley Complex as a Barrier to Gene Flow for *Anopheles gambiae* in Kenya: The mtDNA Perspective 165–168

S

Salmon: A New Autosomal Mutation Demonstrating Incomplete Dominance in the Boine Snake *Boa constrictor* 254–256
SIMCOAL: A General Coalescent Program

for the Simulation of Molecular Data in Interconnected Populations with Arbitrary Demography 506–509
Single-Locus Complementary Sex Determination in *Diadegma chrysostictos* (Gmelin) (Hymenoptera: Ichneumonidae) 104–111
Single-Locus Inheritance in the Allotetraploid *Coffea arabica* L. and Interspecific Hybrid *C. arabica* x *C. canephora* 81–85
Soybean Genetic Map of RAPD Markers Assigned to an Existing Scaffold RFLP Map 392–396
SPAM (Version 3.2): Statistics Program for Analyzing Mixtures 509–510
Systematic Implications of Chromosomal Data from Two Insular Species of *Peromyscus* from the Gulf of California 162–165

T

Trait Association of a Genetic Marker Near the IGF-I Gene in Egg-Laying Chickens 150–156
Turkish Honeybees: Genetic Variation and Evidence for a Fourth Lineage of *Apis mellifera* mtDNA 42–46

V

Variation in the Mitochondrial Control Region in the Juan Fernández Fur Seal (*Arctocephalus philippii*) 371–377

W

WHICHRUN (version 3.2): A Computer Program for Population Assignment of Individuals Based on Multilocus Genotype Data 87–89
White Yellow Virescent Pattern in Winter Rye: Inheritance, Plant Growth, and Ultrastructure of Plastids 237–241

X

X Trisomy in an Infertile Bitch: Cytogenetic, Anatomic, and Histologic Studies 149–150
